

# Infection Prevention and Control Education Program

## 2024 Reprocessing & Sterilisation Update Seminar

This seminar is designed to provide updated information regarding reprocessing and sterilising of RMDs in health service organisations.

### Topics

SA Health is pleased to bring you a diverse range of presenters from metropolitan and regional South Australia who are undertaking work involving reprocessing of reusable medical devices and will report on their experiences working toward best practice and innovation.

Topics include quality management, sustainability, standards implementation, loan/trial instrumentation and building working relationships. A full program will be published shortly.

### Target audience

Reprocessing Managers & Team Leaders responsible for reprocessing of RMDs and compliance with AS5369, Infection Prevention & Control Professionals and Consultants & Educators responsible for accreditation / staff training in reprocessing of RMDs

### Details

<b>Date:</b>	Wednesday, 10 April 2024
<b>Time:</b>	1300 to 1630
