

Infection Prevention and Control Education Program

2025 Reprocessing & Sterilisation Update Seminar

This seminar is designed to provide updated information regarding reprocessing and sterilising of RMDs in health service organisations.

Topics

SA Health is pleased to bring you a diverse range of presenters from metropolitan and regional South Australia who are undertaking work involving reprocessing of reusable medical devices, and will report on their experience in achieving best practice and innovation.

Topics will include facility design and redevelopment, reprocessing in satellite areas, quality management and service improvements. Refer to Final Program.

Target audience

- > Reprocessing Managers & Team Leaders responsible for reprocessing of RMDs and compliance with AS5369, Infection Prevention & Control Professionals and Consultants & Educators responsible for accreditation / staff training in reprocessing of RMDs
